

SAFETY PERFORMANCE CRITERIA

Introduction

1. With effect from 1 April 2022, all tenders called by Singapore Power Limited and its Singapore incorporated subsidiaries (SP Group) will include a tender evaluation criteria that takes into account the participating tenderer's safety performance in their contracts with SP Group. With effect from 1 April 2023, this criteria is extended to subcontractors with LTI.
2. This is in line with SP Group's core value that safety is our highest priority and all our suppliers and contractors must continuously adopt good safety practices and prevent accidents from occurring.

Tender Evaluation Criteria

3. All open and closed tenders published on or after 1 April 2022 by SP Group shall include the new Safety Performance criteria as part of its tender evaluation criteria.
4. The Safety Performance criteria shall be a 1st level evaluation criteria together with Price and/or Quality and shall be of a overall weightage of not less than 10% of the total evaluation score.
5. For tenders that is evaluated based solely on lowest compliant priced tender with no requirement to assess quality (e.g supply of standard items such as HP toner cartridges), the following evaluation method shall apply:

$$\begin{array}{|c|} \hline \text{Total Evaluation} \\ \text{Score} \\ \text{(100\%)} \\ \hline \end{array} = \begin{array}{|c|} \hline \text{Safety} \\ \text{Performance} \\ \text{(10\%)} \\ \hline \end{array} + \begin{array}{|c|} \hline \text{Price} \\ \text{(90\%)} \\ \hline \end{array}$$

6. For tenders that is evaluated based on Price and Quality factors, the following evaluation method shall apply:

$$\begin{array}{|c|} \hline \text{Total Evaluation} \\ \text{Score} \\ \text{(100\%)} \\ \hline \end{array} = \begin{array}{|c|} \hline \text{Safety} \\ \text{Performance} \\ \text{(10\%)} \\ \hline \end{array} + \begin{array}{|c|} \hline \text{Price} \\ \text{(X\%)} \\ \hline \end{array} + \begin{array}{|c|} \hline \text{Quality} \\ \text{(Y\%)} \\ \hline \end{array}$$

Where X + Y = 90%

7. For the avoidance of doubt, other safety related evaluation criteria such as the proposed safety measures to be taken for the tendered project or the tenderer's past safety awards shall be accounted separately under the Quality score.

Safety Performance

8. Safety Performance of tenderers shall be assessed by taking into account the occurrence of any Loss Time Injury (LTI) incidents in the past 2 years prior to tender closing date. In the event of the occurrence of any incidents that results in fatality or serious injury in the past 1 year prior to the tender closing date, the bid submitted by the tenderer may be rejected by SP Group. For the avoidance of doubt only incidents occurring on or after 1 April 2022 will be considered.
9. Loss Time Injury incidents for the purpose of this Safety Performance criteria refers to any incidents where:
 - a. It is a work-related injury occurs which results in lost work time of one work day or more;
 - b. The incident occurred while the tenderer was carrying out works under a contract with SP Group; and
 - c. The incident occurred on or after 1 April 2022.
10. Any incidents that occur in the course of the Tenderer's work in contracts with other parties are not accounted under this criteria's scoring but may considered in the final decision for award.
